```
  Yesterday's session : Admin module screens
  ------------------------------------------
  -> In Admin module we have below functionalities

            1) Account Management
                    - Create Account
                    - View Accounts
                    - Edit Account & Update Account
                    - Activate/De-Activate Account

            2) Plan Management
                    - Create Plan
                    - View Plans
                    - Edit Plan & Update Plan
                    - Activate/De-Activate Plan

  -> DHS department Head will provide Case Worker & Plans details to 'IES Admin'

  -> IES admin will create accounts for Case worker then IES will send mail to Case
  Worker with IES login details.

  -> Case Worker will login into IES to apply plans for Citizens.

  -> In Login page, Forgot Password hyperlink is available to recover the password.

  Login Functionality
  --------------------
  -> Case worker/Admin enters Email and Password will click on 'Login' button

  -> For login functionality application is going to check below conditions

            a) Credentials are valid or not

            b) Account is Active or not

            c) Role of the user
```
