```java
package com.ashokit;

import org.springframework.web.bind.annotation.GetMapping;
import org.springframework.web.bind.annotation.RestController;

import com.netflix.hystrix.contrib.javanica.annotation.HystrixCommand;

@RestController
public class DemoController {

        @GetMapping("/work")
        @HystrixCommand(fallbackMethod = "m2")
        public String m1() {
                String msg = "Hi, i am from m1() method....!!";
                // logic to access data from cache
                return msg;
        }

        public String m2() {
                String msg = "Hi, i am from fallback method...";
                // logic to access data from db
                return msg;
        }

}
```
